

Project Title: The Music Box

Project Type: Video

Idea for a Better World: What? Positive inspiration towards working together. Why? Because then people would become much less ignorant, less lonely, less arrogant and more aware of the world around them, happier, more kind to one another, closer rather than distant, ready to help and support each other. How? By communicating a positive, inspiring example on a large scale - from heart to heart.

About Project: We chose everyone in the video to be very different in their age, gender, race etc. It represents the colorful society that we live in. Each of them are holding different pieces which are necessary to make up a music box, just like everyone of us hold a special talent within us, a talent that makes us unique in the society. Many problems occur (and are ignored) due to the lack of cooperation and ignorance, therefore we would like to invite the world to open up their hearts and become a part of "the mechanism" which is working towards making the world a brighter place.
