

Project Title: Go Ahead - "Making Learning open-source"

Project type: PowerPoint Presentation

Idea for a Better World: I am concerned. I am concerned about the trees, the environment, the dilapidating condition of the nature. I am concerned for the sustainable development. I am concerned about the millions of children who do not have enough to feed, shelter and drape themselves. I am concerned for the children living in the slums-who have not got the guts to face us. I am concerned about the 852 million children around the world who do not have enough to eat. I am concerned about more than 200 million child labours around the world. I am concerned... I am concerned about 'Voicing the Voiceless.' I am concerned about the kind of Education System all around the world. I want to bring all the children into the main fold of a VALUE-BASED Education System. I am concerned about the increasing carbon footprints in the country and the world. I also have a belief that this cannot be achieved alone or even a bunch of 5 to 10 people. This great work requires a greater effort and greater number of people. This would first require the preparation of a generation of change makers, innovators and pioneers. Go Ahead is the first attempt in this. Nelson Mandela said "Education is the most powerful weapon which you can use to change the world". Go Ahead is thus an educational start-up striving hard to make learning open-source. We believe that every kid is special and has some special vocation, which just needs brushing up. 'Go Ahead' is filling this gap. This concern, this passion and this strong determination to make the world a better place to live in has propelled in us and led that our efforts has been appreciated by the UNEP, UNESCO and Volvo Adventures in collaboration. With the motto The Billion Trees, The Million Lives and The Only Dream we are moving forward.

About Project: Nelson Mandela said- "Education is the most powerful weapon which you can use to change the world.". With this idea we started Go Ahead. Go Ahead is an educational start-up on a mission to make LEARNING OPEN SOURCE and raise the next generation of readers. Started with an idea of imparting education to all and reaching out to kids unable to access education even after rigorous governmental plans, Go Ahead is offering them resources, platforms and primarily, books, to LEARN, GROW and GO AHEAD! Go Ahead operates on one simple and astounding fact "being read to as a youngster is the foremost predictor of academic success. A child who succeeds in school will remain there, earning a chance at a better job and a better life in the years ahead. A child who lacks early exposure to reading often suffers from low self-esteem, struggles academically, and is at higher risk for substance abuse, delinquency and many more such ills. Success begins with reading.
